Summary Sheets

~ 5 sheets (double-sided) ~

Duchy Board

~ 1 board ~

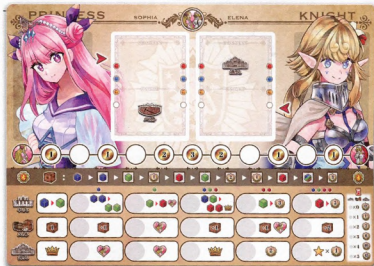

Expedition Board

~ 1 board ~

Personal Boards

~ 5 boards ~

Money

~ 1 Gold: 42 chips / 3 Gold: 40 chips ~

1 Gold

3 Gold

※ Treated as money during the game.

Action Chips

~ Princess: 5 chips (1 per house) ~

~ Knight: 5 chips (1 per house) ~

Bond Chips

~ 10 chips (double-sided, 2 per house) ~

Royal Order Completion Chips

~ 5 chips (1 per house) ~

Round Marker Chip

~ 1 chip ~

Resource Chips

~ Blue: 25 chips / Green: 25 chips / Red: 25 chips ~

※ Treated as 1 unit each of blue, green, and red resources respectively.

~ 5 Chips
~ 25 chips ~

※ Used to represent additional quantities of money or resources.

Wood Markers

~ 90 pieces (18 per colour) ~

※ Attach the Stickers to 2 markers of each colour.

Wood Cubes

~ 55 pieces (11 per colour) ~

Wood Pawns

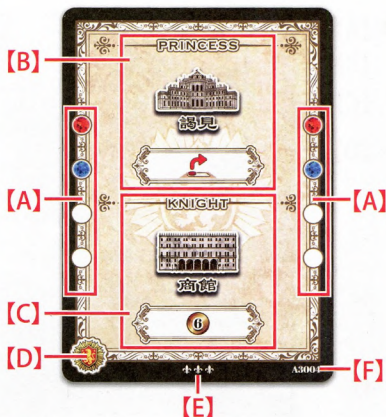

~ 20 pieces (4 per colour) ~

Sticker Sheet
~ 1 sheet ~

Rulebook
~ 1 book ~

How to Read Action Cards

[A] Affinity Icons

Written with 4 colored icons: red, blue, yellow, and green. These are used for the Affinity Check between the Princess and the Knight. The left and right sides have the same content written on them.

[B] Princess Action

The ability used during the Princess' action is written here.

- Some cards also have a Bonus Effect written inside a frame like shown.

[C] Knight Action

The ability used during the Knight's action is written here.

- Some cards also have a Bonus Effect written inside a frame like shown.

[D] "Crest"

Each house's crest is written here.

There are 5 types of crests; remembering your own house's crest will help you play the game smoothly.

House Castione

House Visconti

House Draug

House Berserk

House Einherjar

[E] "Level"

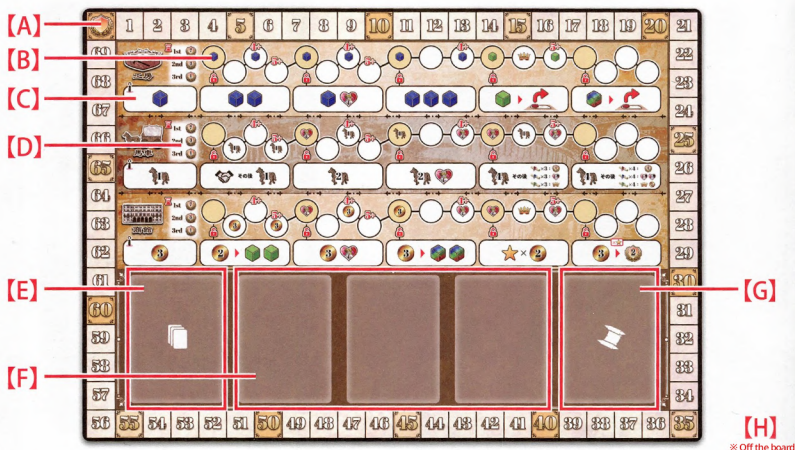

Indicates the card's level.

Cards range from Level 0 to 3, and the number of ♦ symbols matches the level.

[F] "Card Number"

Indicates the Action Card's number.

How to read the Duchy Board

[A] Victory Point Track

Place a Wood Marker for each player here to indicate points.

[B] Development Track

By placing Wood Pawns on spaces, you develop the track and increase the number of options for Knight Actions.

[C] Knight Action Spaces

By placing Wood Pawns on the spaces, you execute the action shown on the space.

[D] Contribution Victory Point Table

At the end of the game, players compare their contribution to the Workshop, Carriage, and Trading House Development tracks. This table shows the victory points earned based on rank.

[E] Draw Pile

Place the Action Card deck corresponding to the current round face-down here.

[F] Card Display

Place 3 Action Cards corresponding to the current round face-up in a row here.

[G] Royal Order

Place the Royal Order card here to indicate the current condition.

[H] Foresight Area * Off the board

Located near the Duchy Board, this is the area where Royal Order Cards and Action Cards that will appear in the game during later rounds are placed, corresponding to level.

(Example) Reference diagram of the Foresight Area

How to read the Expedition Board

[A] Europe
The setting of the game.
Player's place **Wood Cubes** on Ally City spaces to represent the game's status.

: Italian Duchy (Home Country)

: Red Ally City

: Blue Ally City

: Green Ally City

: White Ally City
① Support Bonus
② Alliance Bonus (First player only)

: Roads (Connecting Ally Cities)
① Movement Cost (roads may have no movement cost)

[B] Ally City Victory Point Table
Indicates the victory points earned from Allied Cities at the end of the game.

[C] Round Track
The Round Marker Chip here indicates the current round number.

[D] Turn Order Track
Players' Wood Pawns here indicate the turn order for the current round.

[E] Royal Prestige Track
Players' Wood Cubes here to indicate their current Royal Prestige.

[F] Common Stock ✖ Off the board
Place the following items together within reach of all players:

Blue Resource Chips Green Resource Chips Red Resource Chips

1 Gold Chips

3 Gold Chips

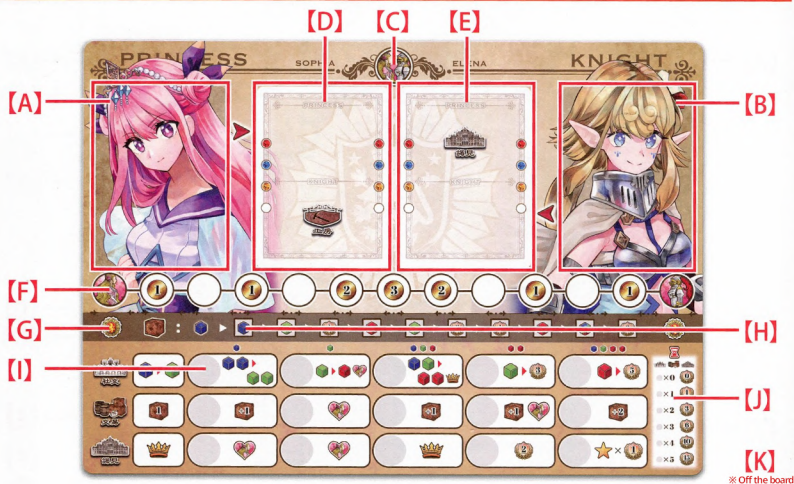

×5 Chips

When acquiring these, take them from the Common Stock, unless otherwise specified.

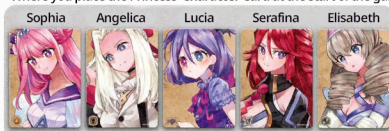

When paying these, return them to the Common Stock.

How to read the Personal Board

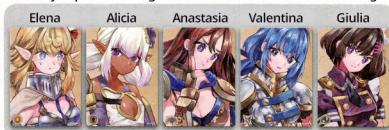

[A] Princess Character Card Area

Where you place the Princess' Character Card at the start of the game.

[B] Knight Character Card Area

Where you place the Knight's Character Card at the start of the game.

Initially, the Princess and Knight are at odds with each other and look displeased (front side). During the game, as you raise the affinity between the Princess and Knight, the distance between them gradually closes and their expressions soften (back side).

Also, as affinity increases, you will be able to execute powerful Bond Actions, so work to raise their affinity!

[C] Bond Chip Area

Where you place Bond Chips at the start of the game.

[D] Princess Area

[E] Knight Area

Both areas are where you play Action Cards.

Always play cards by stacking them on top, and the topmost card is the card referenced for effects.

[F] AffinityTrack

Wood Markers placed here with the Princess and Knight stickers on them indicate their current affinity.

[G] Crest

Each house's crest is written here. (Same as on Action Cards.)

[H] Alliance Cube Area

Where you place Wood Cubes at the start of the game.

[I] Princess Action Space

Shows the victory points earned at the end of the game based on your total development for Socializing, Trade, and Audience respectively.

[J] Development Victory Point Table

Shows the victory points earned at the end of the game based on your total development for Socializing, Trade, and Audience respectively.

[K] Hand Off the board

The place where Action Cards to be played during the game are placed face-down.

You may also hold them in your hand during the game.

Game Objective

In Princess and Knight, each player takes on the role of a prestigious noble house, aiming to be chosen as the new Grand Ducal house in the Grand Duke election, by bringing prosperity to the Italian Duchy and establishing their presence. During the game, these contributions are represented as victory points.

In the game, each turn players will play Action Cards to have the Princess and Knight each carry out various actions.

As the Princess issues policies and the nation develops, the Knight will be able to take more impactful actions, and in turn the Knight's actions will support the Princess' own policies.

Through these actions, the Princess and Knight deepen their bond, allowing the Duchy to develop even more strongly.

At the end of the game, the house controlled by the player who has earned the most victory points becomes the new Grand Ducal house and wins the game.

Game Setup

Game setup is the same for 3 to 5 players. When the player count is 2 players, apply the following the 2-player rule changes.

~ Rule Changes for 2 Players ~

Game Setup (Selecting your Noble House, Duchy Board Setup) → P.07

Round Flow (For the next round) → P.09

End-of-Game Scoring (Workshop, Carriage, and Trading House contribution) → P.13

Selecting your Noble House

Each player randomly selects one of the 5 noble houses and receives the **Personal Board**, **Character Cards**, **Action Cards**, and **Summary Sheet** bearing the same crest, along with 1 color of **Wood Markers**, **Wood Cubes**, and **Wood Pawns**.

At this time, if all players agree, they may choose their houses by any method they wish.

~ Rule Changes for 2 Players ~

Assign a non-player character (NPC). Randomly or by any agreed method, choose a house that no other player is playing. Gather the corresponding Level 1, Level 2, and Level 3 **Action Cards** along with 9 **Wood Markers** of 1 color. These will be used during the game.

Contents corresponding to houses not appearing in the game are returned to the box. (They are not used during the game.)

Setting up the Common Stock

Place the 1 Gold Chips, 3 Gold Chips, Blue Resource Chips, Green Resource Chips, Red Resource Chips, and x5 Chips together to form the Common Stock within reach of all players.

Setting up the Duchy Board

(1) Place the Duchy Board in the center of the table.

(2) Each player places 1 Wood Marker on the Victory Point Track, and start the game at 0 points.

(3) Each player places 1 Wood Pawn each on the leftmost Knight Action Space of the Workshop, Carriage, and Trading House tracks.

(4) Separate all players' Action Cards by level — **Level 1, Level 2, and Level 3** — then shuffle together all cards for each level face-down. Place the Level 1 deck onto the Draw Pile on the Duchy Board.

Take the top 3 cards of the deck and place them face-up in the Card Display.

Do the same for Level 2 and Level 3, placing them in the Foresight Area, with the top 3 cards of each placed face-up.

~ Rule Changes for 2 Players ~

When shuffling **Action Cards**, also shuffle in the NPC's corresponding **Action Cards**. (A total of 3 houses' worth of **Action Cards** are used.)

(5) Randomly select 3 **Royal Order** cards. Place 1 face-up on the Royal Order area on the Duchy Board. Place one of the remaining cards face-up next to the Level 2 cards in the Foresight area, and one next to the Level 3 cards in the Foresight Area. Return the rest to the box. (They are not used during the game.)

Setting up the Expedition Board

(1) Place the Expedition Board in the center of the table.

(2) Place the Round Marker Chip on the 1 space of the Round Track.

(3) Randomly determine the turn order for the first round. Each player places 1 **Wood Pawn** on the Turn Order Track in the space corresponding to their turn order.

(4) Each player places 1 **Wood Cube** on the rightmost space of the Royal Prestige Track.

Setting up the Personal Board

Each player performs the following preparation:

(1) Place the corresponding **Character Cards** face-up on the Princess Character Card Area and Knight Character Card Area.

(2) Stack 2 **Bond Chips** on the Bond Chip Area.

(3) Place a **Wood Marker** with the Princess sticker on the left end of the Affinity Track. This is the Princess Affinity Marker.

(4) Place a **Wood Marker** with the Knight sticker on the right end of the Affinity Track. This is the "Knight Affinity Marker."

(5) Place **Wood Cubes** on each space outlined with thick lines in the Alliance Cube Area. (10 total)

(6) Place **Wood Markers** on each gray space in the Princess Action Space. (15 total)

(7) The 1 **Royal Order Completion Chip** in your possession is used during the game when you achieve the **Royal Order**.

(8) The 2 **Action Chips** in your possession are used during the game when you perform your turn.

(9) Your 3 **Level 0 Action Cards** are your initial Hand.

(10) Receive resources and money corresponding to your play order:

All players: 2 Blue

2nd and 3rd player only: 1 Gold

4th and 5th player only: 2 Gold

~ Variant Start Cards (Optional rule after first time play) ~

From the second time playing and onward, to increase randomness, you may use **Variant Start Cards** at the start of the game.

※ If using Variant Start Cards:

(11) Each player randomly receives 2 **Variant Start Cards** and places 1 card face-up in each of the Princess Area and Knight Area of their Personal Board. You may choose which card goes in which area. (This changes the actions available on your first turn at the start of each game.)

This completes the game preparation. (An example of the game start is on the next page.)

(Example) Reference Diagram of Game Setup (With 4 players, where the red player goes first)

※ The other players also set up their Personal Boards in the same way. —

Game Flow

Princess and Knight is played over a total of **6 rounds**. At the end of the 6th round, End-of-Game Scoring is performed, and the player who has earned the most victory points is the winner (— P.13)

Round Flow

Each round proceeds as follows:

(1) Change Turn Order

※ Skip this step in the round 1.

Determine the turn order for the round in order from the highest Grand Duke's Evaluation to the lowest.

If evaluations are tied (on the same space of the track), reverse the turn order of those players from the previous round's order.

(2) Change the Royal Order and Card Display

In rounds 3 and 5, change the Royal Order and Card Display.

☆ Round 3

Return the Level 1 Action Cards in the Draw Pile and Card Display of the Duchy Board to the box. (They will no longer be used this game.)
Return all Royal Order Completion Chips placed on the Royal Order to each player.

Take the Level 2 cards from the Foresight Area and the Royal Order Card next to them, and place them face-up on the Draw Pile, Card Display, and Royal Order of the Duchy Board respectively. (Stack the Royal Order Cards.)

☆ Round 5

Return the Level 2 Action Cards in the Draw Pile and Card Display of the Duchy Board to the box. (They will no longer be used this game.)
Return all Royal Order Completion Chips placed on the Royal Order to each player.

Take the Level 3 cards from the Foresight Area and the Royal Order Card next to them, and place them face-up on the Draw Pile, Card Display, and Royal Order of the Duchy Board respectively. (Stack the Royal Order Cards.)

(Example) Round Flow for Round 3

(3) Play Turns

Players play their turns in turn order, for a total of **2 turns** in a round. (— P.09)

(4) Preparation for the Next Round

※ Skip this step in round 6 and proceed to End-of-Game Scoring.

- Each player returns their Action Chips to their Hand.
- Advance the Round Marker Chip by 1 space, and proceed to the next round.

~ Rule Changes for 2 Player ~

In rounds 1, 3, and 5, before moving to the next round, place 1 of the NPC's Wood Markers on the leftmost empty space in each row of the Development Track on the **Duchy Board**. (No player receives a bonus for this.)

※ 1 Wood Marker is placed in each of the rows, **Workshop**, **Carriage**, and **Trading House** for 3 total pieces. By the end of Round 5, a total of 6 Wood Markers will have been placed.

(Example) Round Flow during Round 1 (for 2 Players)

In the situation shown below, place 1 of the NPC's Wood Markers (yellow pieces) on each of the red-circled locations.

Turn Flow

The active player proceeds through their turn as follows:

(1) Play a Card

Choose 1 Action Card from your Hand and place it stacked on either the Princess Area or Knight Area on your Personal Board. You cannot place a card where an Action Chip has been placed.

(2) Affinity Check

If all 4 color icons (red, blue, yellow, green) are each shown on either the Princess Area and Knight Area, advance the **affinity** by 1 for the character whose side you just played the card.

All 4 color icons are showing.

Not all 4 color icons are shown.

(The red icon is missing)

(3) Perform Actions

In any order, perform the actions on the side of the cards corresponding to where you played the card.

If played in the Princess Area: **Princess Action**

If played in the Knight Area: **Knight Action**

Reference the icons of both the Princess Area and Knight Area.

Also, **Bonus Effects** written on cards can only be performed for the card just played.

(Example) Playing a card in the Princess Area

If you played in the Princess Area, reference and execute the Princess Actions from both the Princess Area and Knight Area. **Bonus Effects** are performed only from the "Princess Area" side.

(4) Place Action Chip

Place 1 Action Chip on the card you just played.

(Example) If this is the second turn of the round, Action Chips should be placed on both the Princess Area and Knight Area.

(5) Acquire a Card

Choose 1 Action Card from the Card Display and add it to your Hand. Refill the empty spot with 1 card from the Draw Pile face-up.

This ends your turn.

(EX) Executing Bond Actions

At the beginning or end of your turn, you can use a **Bond Chip** to perform a character's **Bond Action**. (→ P.13)

※ You cannot perform a **Bond Action** in the middle of a turn.

◆ Summary: Game Flow (for 3 or more players)

Game Setup

Round 1: Action Cards are Level 1. Play 2 turns.

Round 2: Play 2 turns.

Round 3: Change Action Cards to Level 2. Change Royal Order. Play 2 turns.

Round 4: Play 2 turns

Round 5: Change Action Cards to Level 3. Change Royal Order. Play 2 turns.

Round 6: Play 2 turns

End of Game (Scoring)

Affinity

At the start of the game, the Princess and Knight's affinity is distant and disconnected. By raising the affinity between the Princess and Knight, the distance between them gradually closes.

When increasing the Princess' or Knight's Affinity, advance the Affinity Marker on the Affinity Track of the Personal Board.

When advancing Princess' Affinity by 1, move the Princess Affinity Marker 1 space to the right.

If it is already on the rightmost space, instead gain 1 Gold.

When advancing Knight's Affinity by 1, move the Knight Affinity Marker 1 space to the left.

If it is already on the leftmost space, instead gain 1 Gold.

If the space the Affinity Marker moves onto has a bonus icon, gain it immediately. (This applies for both Princess and Knight.)

Acquiring Bond Chips

If when advancing the Princess' Affinity or Knight's Affinity, the two Affinity Markers are on the same space or have crossed each other, acquire 1 Bond Chip from the Bond Chip Area on the Personal Board, and flip both Character Cards face-down (to their back side).

◆ When placed are on the same space

◆ When crossing over

During the game, you can acquire a maximum of 2 Bond Chips.

When the Princess Affinity Marker is on the rightmost space and the Knight Affinity Marker is on the leftmost space, acquire the a Bond Chip from the Bond Chip Area on the Personal Board.

※ During the game, you can acquire a maximum of 2 Bond Chips.

Royal Prestige

By raising your esteem with the current Grand Duke of the Italian Duchy, you can receive various benefits. The Royal Prestige also affects the turn order each round.

When advancing Royal Prestige by 1, move the Wood Cube left 1 space on the Royal Prestige Track on the Expedition Board.

If it is already on the leftmost space, instead gain 1 Gold.

Bonuses are written above each space on the Royal Prestige Track. Any bonuses on spaces the Wood Cube is moved onto are gained immediately. (Including bonuses passed through.)

☆ symbols are shown below the spaces of the Royal Prestige Track. Some actions reference the total count of these ☆ symbols.

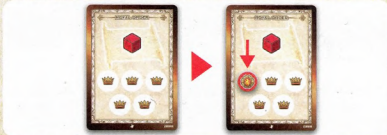

(EXAMPLE)

In the above diagram, the red player has 3 ☆ symbols.

Royal Order

When you fulfill the **bonus condition** on the Royal Order on the Duchy Board, you may place a Royal Order Completion Chip on the Royal Order Card to advance the Royal Prestige by 1.

List of Royal Order bonus conditions (→ P.15)

※ If your Royal Order Completion Chip is already placed on the Royal Order, fulfilling the bonus condition again has no effect.

※ Conditions prior to the Royal Order being placed are ignored; you must fulfill the condition after the Royal Order has been changed.

Princess Action

For each Socialize, Trade, or Audience icon, you may choose either Development or Conduct and carry it out.

社交

交易

謁見

(Example)

In the above example, perform each of Socialize, Bonus Effect, Socialize, and Trade in any order you like. For each of Socialize and Trade, choose either Development or Conduct and perform it.

Development

— Removing Markers —

(1) From Princess Action Space on your Personal Board, choose a space with a Wood Marker on it from the row corresponding to the action icon. (※ You do not need to choose from left to right in order)

(Example) When choosing Development for the Socialize action

In the example above, choose any one of the 3 spaces in the Socialize row that has Wood Markers on it.

(2) Pay the cost corresponding to the chosen space and remove (unlock) 1 Wood Marker from that space.

◆ Unlock Cost Requirement

Space A: 1 Blue Resource

Space B: 1 Green Resource

Space C: 1 Blue Resource + 1 Green Resource + 1 Red Resource

Space D: 2 Red Resources

Space E: 1 Blue Resource + 1 Green Resource + 2 Red Resources

(3) Take the removed Wood Marker and place it on any row of the Development Track on the Duchy Board, on the leftmost space in that row where no Wood Marker is placed. (※ Some spaces on the Development Track are not used based on the number of players.)

(4) If the space where you placed the Wood Marker has a bonus icon, gain it immediately.

※ If all spaces in a row of the Development Track already have Wood Markers, you cannot place in that row.

※ In the rare event that all spaces on the entire Development Track are filled, you may still choose Development as your action; however, the effects of Development are not performed.

◆ Quick Tip

By performing Development, the actions you can Conduct with Princess Actions and Knight Actions increases. At the end of the game, you will earn victory points based on the Development from your Personal Board, and for contribution to the Duchy Board. The balance and timing of Development and Conduct is important.

Conduct

— Performing Actions —

Perform the actions in the row corresponding to the action icon on the Princess Action Space, in any order. During this, actions on spaces where Wood Markers are placed are not performed.

※ All actions on spaces without Wood Markers must be performed.

※ You do not need to perform actions from left to right.

※ You may choose to not perform actions that require a cost.

(Example) When choosing Conduct for the Socialize action

In the above example, perform the actions on the 3 spaces in the Socialize row with no Wood Markers, in any order. Because these actions all require a cost, you can choose if to perform each one.

Socialize

By paying resources, you can gain resources or victory points.

① Pay 1 Blue Resource, gain 1 Green Resource.

② Pay 2 Blue Resource, gain 2 Green Resources.

③ Pay 1 Green Resource, gain 1 Red Resource and advance the Princess' Affinity by 1.

④ Pay 1 Blue Resource and 1 Green Resource, gain 2 Red Resources and advance Royal Prestige by 1.

⑤ Pay 1 Green Resource, gain 3 victory points.

⑥ Pay 1 Red Resource, gain 5 victory points.

Trade

Perform Cube Action X once to gain resources and victory points

◆ Cube Action X

Select X spaces from the Alliance Cube Area on your Personal Board and gain the bonuses shown. X is the total value from spaces where no Wood Markers are placed on the Personal Board.

※ At the start of the game, only Blue Resources can be selected.

※ Spaces where Wood Cubes are placed cannot be selected.

※ The same space cannot be selected more than once in the same Cube Action X.

① Set ☆ to 1. (※ This is the initial minimum, equivalent to +1.)

② +1.

③ Advance the Princess' Affinity by 1.

④ +1 and advance the Princess' Affinity by 1.

⑤ +2.

Audience

Raise your Royal Prestige and the Princess' Affinity.

① Advance Royal Prestige by 1.

② Advance the Princess' Affinity by 1.

③ Gain 2 Victory Points.

④ Gain X Victory Points. X is the number of ☆ the player has.

Knight Action

For each Workshop, Carriage, and Trading House icon, move Wood Pawns on the Duchy Board to perform actions.

(Example)

In the above example, perform each of Workshop $\times 2$, Trading House, and Bonus Effect in any order (※ Unlike Princess Actions, this is performed as Workshop $\times 2$ instead of two separate actions.)

The actions for Workshop, Carriage, and Trading House all follow the same procedure.

Move the Wood Pawn in the corresponding Knight Action Space on the Duchy Board to a different "unlocked" space in the same row, and perform the action shown on the space moved to. **During a single turn, the same Wood Pawn can only be moved once.**

During this, perform the action for each of the Knight Action icon shown. (※ Unlike Princess Actions, identical icons are combined.)

◆ Unlocked Spaces

At the start of the game, all spaces except the leftmost space in each row are locked, and Wood Pawns cannot be moved there.

During the game, when Wood Markers are placed on spaces with the (unlock icon) on the Development Track through Development, the spaces below them become "unlocked" spaces.

Regardless of which player performed the Development, all players can move their Wood Pawns to "unlocked" spaces.

(Example 1) Start of the game

Wood Pawns cannot be moved to any space other than the leftmost of each row.

(Example 2) During the game

In addition to the starting spaces, 2 spaces have been "unlocked," allowing Wood Pawns to be moved there.

Wood Pawns must be moved when an action is taken. (※ You cannot perform the action on the same space as the previous turn.)

You may enter a space another player's Wood Pawn is placed.

Only when a Wood Pawn is on the leftmost space of its row may you take that space's action without moving.

(Example)

The red player performs Workshop $\times 2$ by moving the Wood Pawn once and performing the action on the space moved to twice.

Workshop

You can gain resources, and through Development, you can also perform Development via Knight Actions.

- ① Gain 1 Blue Resource.
- ② Gain 2 Blue Resources.
- ③ Gain 1 Blue Resource and advance the Knight's Affinity by 1.
- ④ Gain 3 Blue Resources.
- ⑤ Pay 1 Green resource, perform any Development once.
- ⑥ Pay any 1 resource, perform any Development once.

Carriage

Perform Alliance X to form allies with various cities across Europe.

◆ Alliance X

Alliance X is performed as follows:

- (1) From the Italian Duchy on the Expedition Board or from an Ally City where your Wood Cube is placed, select 1 Ally City X steps away along connected roads. (X represents the "movement power".)

You cannot select an Ally City where your Wood Cube is already placed. (You may select Ally Cities with other Wood Cubes placed.)

During this, you may pay 5 Gold to increase X by 1. (You may pay as many times as you wish.)

(Example)

In the above example, if X is 1 you may choose any adjacent Ally City connected by road.

If an icon is written on a road, it is a movement cost.

When following a road with a movement cost, you must pay that cost or you cannot use that road.

- (2) Take 1 Wood Cube from the leftmost space of the Alliance Cube Area on your Personal Board and place it on an empty space of the chosen Ally City.

During this, if there are no Wood Cubes left in the Alliance Cube Area (all 10 are already on the Expedition Board), instead gain 1 Gold.

- (3) If the space where you placed the Wood Cube has a bonus icon, gain it immediately. (※ For White Ally Cities, there is a bonus gained by the first player to place a Wood Cube on that space.)

- (4) If you placed a Wood Cube on a White Ally City, immediately gain the Support Bonus shown on that Ally City.

※ Once placed on the Expedition Board, Wood Cubes cannot be moved. (It is wise to plan your alliances carefully.)

- ① Perform Alliance 1 once.
- ② Gain the Support Bonus once from each White Ally City where your Wood Cubes are placed. Then, perform Alliance 1 once.
- ③ Perform Alliance 2 once.
- ④ Perform Alliance 4 once. Then: if you have Wood Cubes in 3 or more Red Ally Cities, gain 1 Victory Point; if you have Wood Cubes in 3 or more Blue Ally Cities, advance the Knight's Affinity by 1; and if you have Wood Cubes in 3 or more Green Ally Cities, advance Royal Prestige by 1.
- ⑤ Perform Alliance 4 once. Then: if you have Wood Cubes in 4 or more Red Ally Cities, gain 2 Victory Points; if you have Wood Cubes in 4 or more Blue Ally Cities, advance the Knight's Affinity by 2; and if you have Wood Cubes in 4 or more Green Ally Cities, advance Royal Prestige by 1 and gain 2 Gold.

Trading House

Gain money, or pay money to gain resources and victory points.

- ① Gain 3 Gold.
- ② Pay 2 Gold, gain 2 Green Resources.
- ③ Gain 3 Gold and advance the Knight's Affinity by 1.
- ④ Pay 3 Gold, gain any 2 resources. (They may be different types.)
- ⑤ Gain $X \times 2$ Gold. X equals the number of ☆ the player has.
- ⑥ Pay 3 Gold, gain 2 Victory Points. This can be performed up to a number of times equal to the number of ☆ the player has.

Bond Action

Each character has a powerful one-time Bond Action that can be executed by using a Bond Chip. (Acquiring Bond Chips — P.10)

- (1) If you have a Bond Chip in your Hand, you can perform a Bond Action at the beginning or end of your turn.
- (2) Choose either the Princess or Knight who has not yet used their Bond Action, and perform that character's Bond Action.
- (3) Place the Bond Chip from your hand onto the chosen Character Card to indicate that the Bond Action has been executed.

Bond Action Available

Bond Action Used

※ Each character's Bond Action can be used up to once each. (You cannot perform the same character's Bond Action more than once.)

End of the Game and Scoring

When round 6 ends, the game is over and scoring begins. Action Cards remaining in your "Hand" at the end of the game do not affect End of Game Scoring.

End of Game Scoring

In addition to victory points earned during the game, players earn the following victory points:

(1) Socialize, Trade, and Audience Completion

For each row on your Personal Board, earn victory points based on the number of Wood Markers removed. (Max. 45 points)

(2) Workshop, Carriage, and Trading House Contribution

Rank the number of Wood Markers placed by each player on each row of the Development Track and earn victory points. (Max. 21 points)

- ※ If you placed 0 Wood Markers, you cannot earn victory points.
- ※ If tied, players share the rank and the next rank is skipped.

(Example 1) Player A has 3, B has 3, and C has 2: Players A and B tie for 1st and each earn 7 points; Player C is 3rd and earns 1 point.

(Example 2) Player A has 2, B has 1, and C has 0: Player A is 1st with 7 points, Player B is 2nd with 3 points, and Player C earns no points.

~ Rule Changes for 2 Players ~

The NPC is compared the same way as regular players for ranking purposes. The NPC does not earn victory points.

(3) Royal Prestige Track

Earn victory points based on the number of ☆ shown up to the space where each player's Wood Cube is placed on the Royal Prestige Track.

(4) Alliance Cube Completion

Earn victory points based on Wood Cubes placed in Ally Cities.

	1	2	3	4	5+
	0	1	3	6	10
	1	2	1	7	10
	1	3	3	7	0
For each Set					3

※ White Ally Cities do not give End of Game victory points.

(5) Best Couple Award

The player with the highest Affinity earns 3 victory points. The player whose two Affinity Markers have moved the most total spaces qualifies. (Maximum 24 spaces)

※ All qualifying players earn the victory points.

(5) Financial Evaluation

Earn 1 Victory Point for every 3 Gold.

During this, convert as much as possible: 2 Blue Resources per 1 Gold, 1 Green Resource per 1 Gold, and 1 Red Resource per 2 Gold.

After scoring, the house with the most victory points becomes the new Grand Ducal house and is the winner of the game.

◆ In case of a tie in victory points

Among tied players, the highest-ranked condition met wins:

- (1) Highest Royal Prestige.
 - (2) Most Wood Markers placed on the Development Track.
 - (3) Most Wood Cubes placed in Ally Cities.
 - (4) Most money held at the end of the game.
 - (5) Play Rock-Paper-Scissors to determine the winner.
- ※ Example: If rank is determined at (1), do not compare (2).
